### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

#### **IN THE DRAWING**

The following changes to the drawings have been approved by the examiner and applicant must make these drawing changes in order to avoid abandonment of the application.

Replace a title of "RELATED ART" in Figs. 23-27 to --PRIOR ART--.

2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the claim invention such as an oxide layer is formed by oxidizing part of a top surface of the protection layer and the bias field applying layers are formed such that parts thereof are laid over the oxide layer, and the oxide layer is removed by etching except for portions thereof to be the nonconductive layers, the portions remaining because of the parts of the bias field applying layers laid over the oxide layer. The two nonconductive layers in two regions that include ends of the magnetoresistive element near the side portions thereof and that are parts of the one of the surfaces of the magnetoresistive element. The closest reference, Aoki et al. (US

PAT. 6,587,315) teach a process of making a magnetoresistive element including a process of removing a protection layer (15), which is formed on top of a free layer (F). However, Aoki et al. fail to teach the two nonconductive layers in two regions that include ends of the magnetoresistive element near the side portions thereof by removing the oxide layer except a portion, which is covered by the bias field applying layers and two electrode layers are covered the two nonconductive layers. Therefore, it would not be obvious to modify Aoki et al. by adding any process to remove the protection layer on the free layer, since doing so would destroy the structure of the magnetoresistive element of Aoki et al.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Claims 1-10 are allowed.
